

Problems experienced with GMDSS equipment on board of ships

In this questionnaire, we intend to identify the most common problems faced by seafarers with the GMDSS equipment on board merchant ships. Additionally, the outcome of this survey will provide useful insight into the potential technical skills for seafarers.

What is/was your rank onboard? *

master

How much sailing time do/did you have? *

15 years

VHF

Have you ever experienced problems with VHF? *

☐ Yes

☒ No

VHF

Which of the following problems have you experienced with the VHF?

- ☐ Unable to turn on the power
- ☐ Fuse blows every time the device is put on the power grid
- ☐ The speakers of the device do not work
- ☐ The speakers of the device make weird noises when the engine of the vessel is on
- ☐ The device displays an 'L' or an 'H'
- ☐ The device does not show a position
- ☐ The VHF only sends in low transmission mode even when high power is selected
- ☐ Transmission power is automatically lowered to 'low'
- ☐ The device displays the message 'PLL UNLOCK' or similar
- ☐ The device does not receive AIS messages
- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

.....

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☐ No

VHF

Please describe how you fixed this problem

Portable GMDSS compliant VHF

Have you experienced problems with portable VHF? *

☒ Yes

☐ No

Portable GMDSS compliant VHF

Which of the following problems have you experienced with the portable GMDSS compliant VHF?

☒ The device displays the message 'Err hw err' or similar

☐ The device displays the message 'illegal' or similar

☐ The device ran out of battery

Did you encounter other problems than the ones listed above with portable GMDSS compliant VHF? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☒ No

Portable GMDSS compliant VHF

Please describe how you fixed this problem

MF/HF

Have you ever experienced problems with the MF/HF? *

☐ Yes

☒ No

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☐ You had to clean the cable between the antenna and the antennatuner
- ☐ You had to re-span the antenna
- ☐ You had to tighten loosened connections
- ☐ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☐ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☐ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☐ The device displays an "EPFS error" or "No position data" or similar
- ☐ The device displays "Trouble: Oven not ready" or similar
- ☐ The device displays "Tune error" or similar
- ☐ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☐ No

MF/HF

Please describe how you fixed this problem

Inmarsat

Have you ever experienced problems with the Inmarsat? *

☒ Yes

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

- ☐ The device displays the message "ANT power voltage abnormality" or similar
- ☐ The device displays the message "Carrier power level" or similar
- ☐ The device displays the message "EEPROM ERROR" or similar
- ☐ The device displays the message "Synthesizer UNLOCK" or similar
- ☐ The device displays the message "External NAV equipment failure" or similar
- ☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☒ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☐ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☒ No

Inmarsat

Please describe how you fixed this problem

Have you ever experienced problems with NAVTEX? *

☐ Yes

☒ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

.....

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☒ Yes

☐ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

A type based on GPS was on board not giving the concentric circles

Where you able to fix the problems that you have encountered? *

☐ Yes

☒ No

Did you encounter other problems than the ones listed above with VHF? Please specify

while set on low power, the vessel's VHF automatically switches to high power when a communication is detected. Even though we deactivated this function. We had to switch it off completely during that cargo operation and use portable ones. A technician fixed it later on. Note: the vessel was just leaving shipyard

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☒ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☒ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

replacing paper

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

- ☐ The self-test indicated a problem
- ☐ The battery of the EPIRB had to be replaced or a problem with the battery arised
- ☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☐ Yes

☒ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

.....

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

SART

Please describe how you fixed this problem

Problems experienced with GMDSS equipment on board of ships

In this questionnaire, we intend to identify the most common problems faced by seafarers with the GMDSS equipment on board merchant ships. Additionally, the outcome of this survey will provide useful insight into the potential technical skills for seafarers.

What is/was your rank onboard? *

Master / pilot

How much sailing time do/did you have? *

75 monhs / 11 years

VHF

Have you ever experienced problems with VHF? *

Yes

No

VHF

Which of the following problems have you experienced with the VHF?

- ☐ Unable to turn on the power
- ☐ Fuse blows every time the device is put on the power grid
- ☐ The speakers of the device do not work
- ☐ The speakers of the device make weird noises when the engine of the vessel is on
- ☐ The device displays an 'L' or an 'H'
- ☐ The device does not show a position
- ☐ The VHF only sends in low transmission mode even when high power is selected
- ☐ Transmission power is automatically lowered to 'low'
- ☐ The device displays the message 'PLL UNLOCK' or similar
- ☐ The device does not receive AIS messages
- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

Poor reception / transmission without warning

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☒ No

VHF

Please describe how you fixed this problem

Portable GMDSS compliant VHF

Have you experienced problems with portable VHF? *

☐ Yes

☒ No

Portable GMDSS compliant VHF

Which of the following problems have you experienced with the portable GMDSS compliant VHF?

☐ The device displays the message 'Err hw err' or similar

☐ The device displays the message 'illegal' or similar

☐ The device ran out of battery

Did you encounter other problems than the ones listed above with portable GMDSS compliant VHF? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

Portable GMDSS compliant VHF

Please describe how you fixed this problem

MF/HF

Have you ever experienced problems with the MF/HF? *

☒ Yes

☐ No

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☐ You had to clean the cable between the antenna and the antennatuner
- ☐ You had to re-span the antenna
- ☐ You had to tighten loosened connections
- ☐ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☐ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☐ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☐ The device displays an "EPFS error" or "No position data" or similar
- ☐ The device displays "Trouble: Oven not ready" or similar
- ☐ The device displays "Tune error" or similar
- ☐ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify

Gmdss console on fire

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

MF/HF

Please describe how you fixed this problem

Switch off

Inmarsat

Have you ever experienced problems with the Inmarsat? *

☒ Yes

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

- ☐ The device displays the message "ANT power voltage abnormality" or similar
- ☐ The device displays the message "Carrier power level" or similar
- ☐ The device displays the message "EEPROM ERROR" or similar
- ☐ The device displays the message "Synthesizer UNLOCK" or similar
- ☐ The device displays the message "External NAV equipment failure" or similar
- ☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☒ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☒ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☒ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Where you able to fix the problems that you have encountered? *

☒ Yes

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

☐ The device displays the message "ANT power voltage abnormality" or similar

☐ The device displays the message "Carrier power level" or similar

☐ The device displays the message "EEPROM ERROR" or similar

☐ The device displays the message "Synthesizer UNLOCK" or similar

☒ The device displays the message "External NAV equipment failure" or similar

☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☒ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☐ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☒ The device displays the message "Unsuccessful call attempt" or similar
- ☒ The device displays the message "Unable to read fwd and ret ID" or similar
- ☒ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

Inmarsat

Please describe how you fixed this problem

as per manual

Have you ever experienced problems with NAVTEX? *

☒ Yes

☐ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☒ Unable to turn on the power

☒ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☒ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☒ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☒ You had to clean the cable between the antenna and the antennatuner
- ☒ You had to re-span the antenna
- ☒ You had to tighten loosened connections
- ☒ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☐ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☐ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☒ The device displays an "EPFS error" or "No position data" or similar
- ☒ The device displays "Trouble: Oven not ready" or similar
- ☒ The device displays "Tune error" or similar
- ☒ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify
inadequate service reports or manufacturers guidelines

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

Please describe how you fixed this problem

same as previous often item will be replaced after 12 years.

Inmarsat

Have you ever experienced problems with the Inmarsat? *

☒ Yes

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

☐ The device displays the message "ANT power voltage abnormality" or similar

☐ The device displays the message "Carrier power level" or similar

☐ The device displays the message "EEPROM ERROR" or similar

☐ The device displays the message "Synthesizer UNLOCK" or similar

☒ The device displays the message "External NAV equipment failure" or similar

☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☒ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☒ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☒ The device displays the message "Unsuccessful call attempt" or similar
- ☒ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

.....

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

Inmarsat

Please describe how you fixed this problem

software updates on regular bases are required

Problems experienced with GMDSS equipment on board of ships

In this questionnaire, we intend to identify the most common problems faced by seafarers with the GMDSS equipment on board merchant ships. Additionally, the outcome of this survey will provide useful insight into the potential technical skills for seafarers.

What is/was your rank onboard? *

Second officer

How much sailing time do/did you have? *

More or less than 15 years

VHF

Have you ever experienced problems with VHF? *

☒ Yes

☐ No

VHF

Which of the following problems have you experienced with the VHF?

- ☐ Unable to turn on the power
- ☐ Fuse blows every time the device is put on the power grid
- ☐ The speakers of the device do not work
- ☐ The speakers of the device make weird noises when the engine of the vessel is on
- ☐ The device displays an 'L' or an 'H'
- ☒ The device does not show a position
- ☐ The VHF only sends in low transmission mode even when high power is selected
- ☐ Transmission power is automatically lowered to 'low'
- ☐ The device displays the message 'PLL UNLOCK' or similar
- ☐ The device does not receive AIS messages
- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☒ No

VHF

Please describe how you fixed this problem

Portable GMDSS compliant VHF

Have you experienced problems with portable VHF? *

☐ Yes

☒ No

Portable GMDSS compliant VHF

Which of the following problems have you experienced with the portable GMDSS compliant VHF?

☐ The device displays the message 'Err hw err' or similar

☐ The device displays the message 'illegal' or similar

☐ The device ran out of battery

Did you encounter other problems than the ones listed above with portable GMDSS compliant VHF? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

Portable GMDSS compliant VHF

Please describe how you fixed this problem

MF/HF

Have you ever experienced problems with the MF/HF? *

☒ Yes

☐ No

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☐ You had to clean the cable between the antenna and the antennatuner
- ☐ You had to re-span the antenna
- ☒ You had to tighten loosened connections
- ☐ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☐ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☐ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☐ The device displays an "EPFS error" or "No position data" or similar
- ☐ The device displays "Trouble: Oven not ready" or similar
- ☐ The device displays "Tune error" or similar
- ☐ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify

No

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

MF/HF

Please describe how you fixed this problem

Just checking all the connections at the back of the MF/HF radio take it out and plug it again

Inmarsat

Have you ever experienced problems with the Inmarsat? *

☒ Yes

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

- ☐ The device displays the message "ANT power voltage abnormality" or similar
- ☐ The device displays the message "Carrier power level" or similar
- ☐ The device displays the message "EEPROM ERROR" or similar
- ☐ The device displays the message "Synthesizer UNLOCK" or similar
- ☐ The device displays the message "External NAV equipment failure" or similar
- ☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☐ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☐ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

No

Where you able to fix the problems that you have encountered? *

☒ Yes

☐ No

Inmarsat

Please describe how you fixed this problem

Call a technician

Have you ever experienced problems with NAVTEX? *

☐ Yes

☒ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☐ Yes

☒ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

.....

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

SART

Please describe how you fixed this problem

.....

End

If you have any more remarks, please leave them down below.

It's is very important to do the weekly or monthly testing if all the equipments it will help you to monitor if there's any problem.

.....

Thank you for completing this survey!

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☐ Yes

☒ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Problems experienced with GMDSS equipment on board of ships

In this questionnaire, we intend to identify the most common problems faced by seafarers with the GMDSS equipment on board merchant ships. Additionally, the outcome of this survey will provide useful insight into the potential technical skills for seafarers.

What is/was your rank onboard? *

Second Officer

How much sailing time do/did you have? *

5

VHF

Have you ever experienced problems with VHF? *

☐ Yes

☒ No

VHF

Which of the following problems have you experienced with the VHF?

- ☐ Unable to turn on the power
- ☐ Fuse blows every time the device is put on the power grid
- ☐ The speakers of the device do not work
- ☐ The speakers of the device make weird noises when the engine of the vessel is on
- ☐ The device displays an 'L' or an 'H'
- ☐ The device does not show a position
- ☐ The VHF only sends in low transmission mode even when high power is selected
- ☐ Transmission power is automatically lowered to 'low'
- ☐ The device displays the message 'PLL UNLOCK' or similar
- ☐ The device does not receive AIS messages
- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☐ No

VHF

Please describe how you fixed this problem

Portable GMDSS compliant VHF

Have you experienced problems with portable VHF? *

☐ Yes

☒ No

Portable GMDSS compliant VHF

Which of the following problems have you experienced with the portable GMDSS compliant VHF?

☐ The device displays the message 'Err hw err' or similar

☐ The device displays the message 'illegal' or similar

☐ The device ran out of battery

Did you encounter other problems than the ones listed above with portable GMDSS compliant VHF? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

Portable GMDSS compliant VHF

Please describe how you fixed this problem

MF/HF

Have you ever experienced problems with the MF/HF? *

☒ Yes

☐ No

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☐ You had to clean the cable between the antenna and the antennatuner
- ☐ You had to re-span the antenna
- ☐ You had to tighten loosened connections
- ☐ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☐ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☐ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☐ The device displays an "EPFS error" or "No position data" or similar
- ☐ The device displays "Trouble: Oven not ready" or similar
- ☐ The device displays "Tune error" or similar
- ☐ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify

Problem with weekly test on shore station.

☐ The device displays the message "External NAV equipment failure" or similar

☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☐ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☐ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☐ No

Inmarsat

Please describe how you fixed this problem

Have you ever experienced problems with NAVTEX? *

☐ Yes

☒ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☐ Yes

☒ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

.....

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

SART

Please describe how you fixed this problem

Problems experienced with GMDSS equipment on board of ships

In this questionnaire, we intend to identify the most common problems faced by seafarers with the GMDSS equipment on board merchant ships. Additionally, the outcome of this survey will provide useful insight into the potential technical skills for seafarers.

What is/was your rank onboard? *

3rd officer

How much sailing time do/did you have? *

32 months

VHF

Have you ever experienced problems with VHF? *

Yes

No

VHF

Which of the following problems have you experienced with the VHF?

- ☐ Unable to turn on the power
- ☐ Fuse blows every time the device is put on the power grid
- ☐ The speakers of the device do not work
- ☐ The speakers of the device make weird noises when the engine of the vessel is on
- ☐ The device displays an 'L' or an 'H'
- ☐ The device does not show a position
- ☒ The VHF only sends in low transmission mode even when high power is selected
- ☒ Transmission power is automatically lowered to 'low'
- ☐ The device displays the message 'PLL UNLOCK' or similar
- ☐ The device does not receive AIS messages
- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

VHF freezes

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

VHF

Please describe how you fixed this problem

By restarting the equipment

Portable GMDSS compliant VHF

Have you experienced problems with portable VHF? *

☐ Yes

☒ No

Portable GMDSS compliant VHF

Which of the following problems have you experienced with the portable GMDSS compliant VHF?

☐ The device displays the message 'Err hw err' or similar

☐ The device displays the message 'illegal' or similar

☐ The device ran out of battery

Did you encounter other problems than the ones listed above with portable GMDSS compliant VHF? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

Portable GMDSS compliant VHF

Please describe how you fixed this problem

MF/HF

Have you ever experienced problems with the MF/HF? *

☐ Yes

☒ No

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☐ You had to clean the cable between the antenna and the antennatuner
- ☐ You had to re-span the antenna
- ☐ You had to tighten loosened connections
- ☐ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☐ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☐ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☐ The device displays an "EPFS error" or "No position data" or similar
- ☐ The device displays "Trouble: Oven not ready" or similar
- ☐ The device displays "Tune error" or similar
- ☐ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☐ No

MF/HF

Please describe how you fixed this problem

Inmarsat

Have you ever experienced problems with the Inmarsat? *

☒ Yes

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

- ☐ The device displays the message "ANT power voltage abnormality" or similar
- ☐ The device displays the message "Carrier power level" or similar
- ☐ The device displays the message "EEPROM ERROR" or similar
- ☐ The device displays the message "Synthesizer UNLOCK" or similar
- ☐ The device displays the message "External NAV equipment failure" or similar
- ☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☐ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☐ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Yes in Sat-c , unable to select satellite

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

Inmarsat

Please describe how you fixed this problem

By continuously selecting the same satellite and restarting the equipment

Have you ever experienced problems with NAVTEX? *

☐ Yes

☒ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

Most of our problems occur when we try to contact the radio room of an offshore platform. E.g. 2h notice prior to arrive in the field. Most of the time we have to contact the (much smaller) guard vessel in order to relay our message.

Where you able to fix the problems that you have encountered? *

Please describe how you fixed this problem

MF/HF

Have you ever experienced problems with the MF/HF? *

☒ Yes

☐ No

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☐ You had to clean the cable between the antenna and the antennatuner
- ☐ You had to re-span the antenna
- ☐ You had to tighten loosened connections
- ☐ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☐ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☐ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☐ The device displays an "EPFS error" or "No position data" or similar
- ☐ The device displays "Trouble: Oven not ready" or similar
- ☐ The device displays "Tune error" or similar
- ☐ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify

From time to time the device freezes.

From time to time the devices aborts the self test prior to completion.

More and more coastguard stations do not reply on the DSC test messages. (Annoying since from time to time you have to prove the acknowledgement messages during audits.)

Where you able to fix the problems that you have encountered? *

☒ Yes

☐ No

MF/HF

Please describe how you fixed this problem

Restart the MF/HF receiver.

Restart the receiver and the self test.

Contact coastguard by means of VHF / Sat telephone / e-mail and request a MF/HF test. Or make a test with another vessel in order to rule out that your MF/HF transmitter/receiver is not working properly.

Inmarsat

Have you ever experienced problems with the Inmarsat? *

☒ Yes

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

- ☐ The device displays the message "ANT power voltage abnormality" or similar
- ☐ The device displays the message "Carrier power level" or similar
- ☐ The device displays the message "EEPROM ERROR" or similar
- ☐ The device displays the message "Synthesizer UNLOCK" or similar
- ☒ The device displays the message "External NAV equipment failure" or similar
- ☒ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☐ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☐ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Device crashed after accidental removal of boot files by deck cadet who had to erase the EGC messages during the weekly GMDSS test.

Device freezes during the link test.

Alarm freezes after the reception of a distress message.

Where you able to fix the problems that you have encountered? *

☒ Yes

☐ No

Inmarsat

Please describe how you fixed this problem

Install back-up files on the device together with electrician.

Reboot device and link-test.

Reboot device in order to reset the alarm.

NAVTEX

Have you ever experienced problems with NAVTEX? *

☒ Yes

☐ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

- ☐ Unable to turn on the power
- ☐ NAVTEX signal cannot be received
- ☐ The equipment receives unwanted messages
- ☐ There was a problem with the printer of the NAVTEX
- ☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Device showed NG during the self test.

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

NAVTEX

Please describe how you fixed this problem

Reboot the unit.

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

.....

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☒ Yes

☐ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☒ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

Where you able to fix the problems that you have encountered? *

☒ Yes

☐ No

SART

Please describe how you fixed this problem

Order new battery pack for the SART

End

If you have any more remarks, please leave them down below.

Problems experienced with GMDSS equipment on board of ships

In this questionnaire, we intend to identify the most common problems faced by seafarers with the GMDSS equipment on board merchant ships. Additionally, the outcome of this survey will provide useful insight into the potential technical skills for seafarers.

What is/was your rank onboard? *

Master

How much sailing time do/did you have? *

15

VHF

Have you ever experienced problems with VHF? *

☐ Yes

☒ No

VHF

Which of the following problems have you experienced with the VHF?

- ☐ Unable to turn on the power
- ☐ Fuse blows every time the device is put on the power grid
- ☐ The speakers of the device do not work
- ☐ The speakers of the device make weird noises when the engine of the vessel is on
- ☐ The device displays an 'L' or an 'H'
- ☐ The device does not show a position
- ☐ The VHF only sends in low transmission mode even when high power is selected
- ☐ Transmission power is automatically lowered to 'low'
- ☐ The device displays the message 'PLL UNLOCK' or similar
- ☐ The device does not receive AIS messages
- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☐ No

VHF

Please describe how you fixed this problem

Portable GMDSS compliant VHF

Have you experienced problems with portable VHF? *

☒ Yes

☐ No

Portable GMDSS compliant VHF

Which of the following problems have you experienced with the portable GMDSS compliant VHF?

☐ The device displays the message 'Err hw err' or similar

☐ The device displays the message 'illegal' or similar

☐ The device ran out of battery

Did you encounter other problems than the ones listed above with portable GMDSS compliant VHF? Please specify

Bad signal, interruption

Where you able to fix the problems that you have encountered? *

☐ Yes

☒ No

Portable GMDSS compliant VHF

Please describe how you fixed this problem

MF/HF

Have you ever experienced problems with the MF/HF? *

☒ Yes

☐ No

MF/HF

Which of the following repairs or problems have you experienced with MF/HF?

- ☐ You had to clean the cable between the antenna and the antennatuner
- ☐ You had to re-span the antenna
- ☐ You had to tighten loosened connections
- ☒ You had to replace damaged insulators
- ☐ Unable to turn on the power
- ☒ The speaker of the device does not work or is noisy
- ☐ Transmission power is automatically lowered to 'low'
- ☒ Antenna coupler cannot tune the antenna
- ☐ The device displays the message "Ship's mains failure", output power indicator blinks and transmission power is decreased to LOW or similar
- ☐ The device displays an "EPFS error" or "No position data" or similar
- ☐ The device displays "Trouble: Oven not ready" or similar
- ☐ The device displays "Tune error" or similar
- ☐ The device displays "PLL UNLOCK" or similar

Did you encounter other problems than the ones listed above with MF/HF? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☒ No

MF/HF

Please describe how you fixed this problem

Inmarsat

Have you ever experienced problems with the Inmarsat? *

☐ Yes

☒ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

- ☐ The device displays the message "ANT power voltage abnormality" or similar
- ☐ The device displays the message "Carrier power level" or similar
- ☐ The device displays the message "EEPROM ERROR" or similar
- ☐ The device displays the message "Synthesizer UNLOCK" or similar
- ☐ The device displays the message "External NAV equipment failure" or similar
- ☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☐ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☐ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Where you able to fix the problems that you have encountered? *

- ☐ Yes
- ☐ No

Inmarsat

Please describe how you fixed this problem

Have you ever experienced problems with NAVTEX? *

☐ Yes

☒ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☒ Yes

☐ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☒ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

.....

Where you able to fix the problems that you have encountered? *

☐ Yes

☒ No

SART

Please describe how you fixed this problem

☒ NAVTEX signal cannot be received

☒ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☒ No

NAVTEX

Please describe how you fixed this problem

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☐ Yes

☒ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

.....

☐ No

Inmarsat

Which of the following repairs or problems have you experienced with Inmarsat-C?

- ☐ The device displays the message "ANT power voltage abnormality" or similar
- ☐ The device displays the message "Carrier power level" or similar
- ☐ The device displays the message "EEPROM ERROR" or similar
- ☐ The device displays the message "Synthesizer UNLOCK" or similar
- ☐ The device displays the message "External NAV equipment failure" or similar
- ☐ The device displays the message "Internal GPS UNIT failure" or similar

Which of the following repairs or problems have you experienced with Inmarsat Fleet 77?

- ☐ The device does not power up
- ☐ All dialups dial in MPDS mode (Mobile Packet Data Services)
- ☐ The handset display stays completely black
- ☐ The device has problems with data communication
- ☐ There is no communication or very noisy communication
- ☐ The device displays the message "Unsuccessful call attempt" or similar
- ☐ The device displays the message "Unable to read fwd and ret ID" or similar
- ☐ The device displays the message "Traffic log is full" or similar

Did you encounter other problems than the ones listed above with Inmarsat-C or Inmarsat Fleet 77? Please specify

Breakdown of LRIT antenna (connected to Sat C), Loss of signal due to shifting satellite.

Where you able to fix the problems that you have encountered? *

- ☒ Yes
- ☐ No

Inmarsat

Please describe how you fixed this problem

Renewal LRIT antenna, manual login when satellite signal lost

Have you ever experienced problems with NAVTEX? *

☐ Yes

☒ No

NAVTEX

Which of the following repairs or problems have you experienced with NAVTEX?

☐ Unable to turn on the power

☐ NAVTEX signal cannot be received

☐ The equipment receives unwanted messages

☐ There was a problem with the printer of the NAVTEX

☐ Batteries of the NAVTEX had to be changed (only applicable to some models)

Did you encounter other problems than the ones listed above with NAVTEX? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

NAVTEX

Please describe how you fixed this problem

EPIRB

Have you ever experienced problems with EPIRB? *

☐ Yes

☒ No

EPIRB

Which of the following problems have you experienced with the EPIRB?

☐ The self-test indicated a problem

☐ The battery of the EPIRB had to be replaced or a problem with the battery arised

☐ The EPIRB is not correctly mounted

Did you encounter other problems than the ones listed above with EPIRB? Please specify

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

EPIRB

Please describe how you fixed this problem

SART

Have you ever experienced problems with SART? *

☐ Yes

☒ No

SART

Which of the following problems have you experienced with the SART?

☐ The self-test indicated a problem

☐ The battery of the SART had to be replaced or a problem with the battery arised

☐ The SART is not correctly mounted

Did you encounter other problems than the ones listed above with SART? Please specify

.....

Where you able to fix the problems that you have encountered? *

☐ Yes

☐ No

SART

Please describe how you fixed this problem

.....

End

If you have any more remarks, please leave them down below.

Note that most VDR systems have their own EPIRB, only few landstations still respond to DSC call testing.

.....

Problems experienced with GMDSS equipment on board of ships

In this questionnaire, we intend to identify the most common problems faced by seafarers with the GMDSS equipment on board merchant ships. Additionally, the outcome of this survey will provide useful insight into the potential technical skills for seafarers.

What is/was your rank onboard? *

Marine Consultant

How much sailing time do/did you have? *

19

VHF

Have you ever experienced problems with VHF? *

☒ Yes

☐ No

VHF

Which of the following problems have you experienced with the VHF?

- ☐ Unable to turn on the power
- ☐ Fuse blows every time the device is put on the power grid
- ☐ The speakers of the device do not work
- ☐ The speakers of the device make weird noises when the engine of the vessel is on
- ☒ The device displays an 'L' or an 'H'
- ☐ The device does not show a position
- ☐ The VHF only sends in low transmission mode even when high power is selected
- ☒ Transmission power is automatically lowered to 'low'
- ☐ The device displays the message 'PLL UNLOCK' or similar
- ☒ The device does not receive AIS messages
- ☐ The device shows NG after a diagnostic test
- ☐ The device displays the message "Startup failed. Turn the system off and wait a short while before turning the system on again." or similar

Did you encounter other problems than the ones listed above with VHF? Please specify

Where you able to fix the problems that you have encountered? *
